OBJECTIVE

To grow as a Backend/Full Stack Java Developer, contribute to scalable real-world applications, and develop expertise in cloud technologies and microservices within the next 2–3 years.

EDUCATION

DCRUST University, Murthal, Haryana

2020 - 2024

Bachelor of Technology, Electronics and Communication Engineering

PROJECTS

Full Stack Bank Management System [Link](#)

- Developed a secure banking application using Spring Boot, Spring Security, and JWT-based authentication.
- Implemented user onboarding, KYC verification, profile management, and multiple account types.
- Built core banking modules for deposits, withdrawals, fund transfers, balance validation, and transaction history.
- Applied account balance validation and transaction processing to ensure reliable fund transfers.
- Designed RESTful APIs and role-based authorization to ensure secure access and data integrity.

Smart Email Assistant [Link](#)

- Created a Smart Email Assistant using Spring Boot and Gemini AI for automated email responses.
- Implemented customizable email tones using prompt engineering for context-aware reply generation.
- Integrated Gemini AI with Spring WebClient for real-time content generation and API communication.
- Designed RESTful APIs with secure API key authentication and JSON payload processing.
- Utilized JSON parsing using Jackson ObjectMapper and applied layered architecture for scalability.

EXPERIENCE

AccioJob Training Program

September 2024 – Present

Java Full Stack Development Trainee

Remote

- Completed intensive training in Java, Spring Boot, SQL, Data Structures & Algorithms, and Full Stack Development.
- Solved coding problems and participated in coding contests to strengthen problem-solving and algorithmic skills.
- Built hands-on projects using Java, Spring Boot, REST APIs, and database technologies.
- Participated in mock interviews and technical assessments to improve software engineering interview readiness.

Indivm Energy Pvt. Ltd.

September 2023 – August 2024

Web Developer Intern

Haryana

- Optimized front-end architecture, improving page load times by 25% and reducing UI issues by 35%.
- Partnered with developers and stakeholders to deliver responsive, user-centric interface enhancements.
- Assisted in maintaining and enhancing existing web applications based on business requirements.

SKILLS

- Backend:** Java | Spring Boot | RESTful APIs | Spring Security | Hibernate
- Frontend:** HTML5 | CSS3 | JavaScript
- Databases:** MySQL | PostgreSQL
- Tools:** Git & GitHub | Postman | DBeaver | Swagger UI | Docker | IntelliJ IDEA | VS Code
- Soft Skills:** Team Collaboration & Technical Communication, Project Planning & Task Management

ACHIEVEMENTS

- Practiced 1200+ DSA problems across multiple platforms like Leetcode, GFG, AccioJob.
- Maintained a 400+ days coding streak while consistently practicing Data Structures and Algorithms.
